KINGSPAN INSULATION GUIDE TO 2010 BUILDING REGULATIONS

Market leader Kingspan Insulation has published four individual guides to meeting the requirements of the four new 2010 Approved Documents L to the Building Regulations, which deal with the conservation of fuel and power in domestic and non-domestic new builds and refurbishments.

The clear and concise publications have been published to provide designers, specifiers, installers and end users with detailed information on the effect that the new Approved Documents will have on methods of roof, wall and floor construction together with the thicknesses of Kingspan Insulation products required to achieve the new standards.

John Garbutt, marketing director at Kingspan Insulation commented "Kingspan Insulation is committed to providing its customers with the fullest support and information in an easy to understand and convenient format, and that is why we felt four separate editions would enable users to access the information they require as quickly as possible."

Copies of the guides can be downloaded from www.insulation.kingspan.co.uk/part1
